LANGUAGES

SPANISH	Native
ENGLISH	B2

AVAILABILITY

- Available from 2027
- Morning schedule

TECHNOLOGIES/SKILLS

Languages & Databases

Java, C++, JavaScript, Python, MySQL, PostgreSQL, MongoDB

Frameworks

Spring Boot, Flask, React, Tailwind

DevOps

Docker, Git, Vercel, Render, Neon

IDEs & Tools

IntelliJ, VS Code, Visual Studio, Postman

Soft Skills

- Responsible
- Strong learning ability
- Resourceful / results-driven
- Passionate about new technologies
- Eager to learn

MY PROFILE

Final-year Software Engineering student interested in backend and web development. I have built applications and REST APIs using technologies such as Java, Python and JavaScript, working with SQL databases and Docker-based deployment. I am looking for an internship to keep growing by contributing to real-world projects.

EDUCATION

BACHELOR'S DEGREE IN SOFTWARE ENGINEERING

Universidad Complutense de Madrid · 2023 - Present

Final year · Expected graduation: June 2027

PROJECTS

• Bachelor's Thesis (in progress)

Academic project · Final Degree Project

Platform to learn, improve and play chess. Developed individually together with the thesis supervisor. It consists of two phases: first, building the application itself using Stockfish as the main engine, and second, developing a custom chess engine from scratch.

C++ · Java · Spring Boot · PostgreSQL · Docker · React · Vite · Tailwind

• TrainTracker

Personal project

Full-stack web application for searching and booking train trips. Built the complete frontend and REST API with JWT authentication. Containerised with Docker and deployed to the cloud (Vercel, Render and Neon).

Java · Spring Boot · PostgreSQL · Docker · React · Vite · Tailwind

• SmartCook

Academic project · Software Project Management

Winner of the UCM FDI Talent Award

Mobile app for planning weekly meals. Developed using the Scrum methodology in a 10-person team, delivering a functional MVP after two sprints.

Python · Flask · MongoDB · React · Vite · Tailwind · Capacitor

• Band Souls

Academic project · Web Game Development

2D wave-based combat browser game. Built by a five-person team, starting with a design phase. Deployed on GitHub Pages.

HTML · JavaScript · Phaser
